Author ID: LD
Leaflet Ref: Phy 075
Version: 2
Leaflet title: Shoulder Mobility Class
Date Produced: March 2023
Expiry Date: March 2025

Introduction

You have been referred to the Shoulder Mobilising Class as your physiotherapist feels you may benefit from regular, structured exercise sessions in a group environment.

The class is used to assist in regaining range of motion in the stiff shoulder which may be secondary to a 'frozen shoulder' or a period of immobility post injury.

Aims

The aims of this class are to help maintain and restore movement and function in the affected arm via supervised exercises. It is an option for patients wishing to avoid 'invasive' procedures and is done in an inclusive and supportive environment. We use a short, validated questionnaire pre and post class to evaluate outcomes.

Risks

With most conditions that are seen in physiotherapy, a stiff shoulder may also be painful. Some of the exercises that we do in the class may be sore; we suggest that you pace yourself with these exercises initially. Rarely, you can, feel pain for 2-3 days after the class; typically, there will be an ache for 1-2 hours following the class. This can be managed by your usual pain-relieving medication and any concerns can be discussed with the physiotherapists leading the class.

Benefits

Research shows that performing exercises in a class environment can lead to improved outcomes. It offers social leads to increased function and range of movement. You will receive weekly physiotherapist contact and coaching on exercises. The class itself was based on research to evaluate the effect of exercise in frozen shoulder and was shown to make a positive difference.

What do I need to do?

Please attend wearing loose comfortable clothing. We also ask that you bring any questionnaires that your physiotherapist has given you to complete prior to the class, along with any reading glasses you require.

Comments, Compliments or Complaints

The Patient Relations/Patient Advice and Liaison Service (PALS) Department provides confidential on the spot advice, information and support to patients, relatives, friends, and carers.

Ask 3 Questions

Become more involved in decisions about your healthcare. You may be asked to make choices about your treatment. To begin with, try to make sure you get the answers to three key questions:

1. What are my options?
2. What are the positives and negatives of each option for me?
3. How do I get support to help me make a decision that is right for me?

How We Use Your Information

For details on how we collect, use, and store the information we hold about you, please see patient information leaflet, Ref. **Corp 006** How we use your information, this can be found on the Patient Information Leaflets page on the Trust website, see details on the front cover.

This leaflet is also available in audio, large print, Braille, and other languages upon request. For more information, please ask in the department/ward.
