Ask 3 Questions

Become more involved in decisions about your healthcare. You may be asked to make choices about your treatment. To begin with, try to make sure you get the answers to three key questions:

1. What are my options?
2. What are the positives and negatives of each option for me?
3. How do I get support to help me make a decision that is right for me?

How We Use Your Information

For details on how we collect, use, and store the information we hold about you, please see patient information leaflet, Ref. **Corp 006** How we use your information, this can be found on the Patient Information Leaflets page on the Trust website, see details on the front cover.

This leaflet is also available in audio, large print, braille, and other languages upon request.
For more information please ask in the department/ward.

GOLD AWARD 2021

Proudly serving those who serve.

Author ID: AA
Leaflet Ref: Audio 017
Version: 1
Leaflet title: Hearing Aids & Bluetooth
Date produced: September 2022
Expiry Date: September 2024

Introduction

You can utilise the Bluetooth feature in the hearing aids in different ways:

- A. As hearing aids with streaming options - this means you can listen to phone calls and media via Bluetooth.
- B. As regular hearing aids, with the use of the MyPhonak App – this allows you to adjust the sound of your hearing aids. In the long term, we will be able to provide an option of remote appointments in your own home.
- C. As regular hearing aids, with both the above options together.

Bluetooth Guide

You should have been issued with a Bluetooth guide, which will support you in getting this set up. If not, please contact the department.

Here are some simple steps to ensure that everything is working well for you.

1. Firstly, check that your mobile phone / tablet is compatible to work with the Bluetooth technology. You can use the link below:

<https://www.phonak.com/com/en/support/product-support/compatibility.html>

2. Ensure that your phone has the latest software upgrade. If in doubt, check with your mobile phone manufacturer.
3. Try restarting the hearing aids by opening and closing the battery drawers.
4. When connecting to Bluetooth settings, the Bluetooth device will only pair to one of your hearing aids and stream through both.
5. When connecting the app, you first need to pair one hearing aid to your mobile phone. Then pair both of your hearing aids to the app.

6. If you lose connection, click 'Forget this device' on the app or follow your phone instructions on how to 'forget' the device and then pair to the hearing aids again.

For more frequently asked questions please visit:
